I'm someone just like you, just an ordinary everyday person who unfortunately happened to suffer with angular cheilitis repeatedly for a number of years. But not any more, Why?, because thankfully I found a solution to my cheilitis.

I found a simple way to put an end to my condition once and for all, which is the reason I put this short but helpful guide together.

Angular cheilitis, more commonly known in its less severe form as perleche, is often caused by a fungal infection that can dry out your lips and make your life miserable.

Aside from making you feel embarrassed and unattractive, angular cheilitis can get so bad that it hurts to open your mouth.

Luckily, there are a number of possible cures and a natural home remedy for angular cheilitis. One has to be careful, however, because some home remedies only treat the apparent dryness in the lips not fully cure the condition.
Angular Cheilitis Treatments

Before finding the right treatment for your angular cheilitis, you should always consult a doctor first about your condition to avoid any misdiagnosis that may result in a much more serious condition.

The first and most often-used remedy for angular cheilitis treatment is the doctor-recommended one: a topical antifungal or steroid, or an oral antifungal.

However, for most patients, the creams and pills don’t work, I was one of them!

If you have dentures, the initial onset of the disease may have infected them. So soaking the dentures in a ten-to-one part solution of water to household bleach can disinfect the dentures.

Keep in mind, this method is to be used in conjunction with other angular cheilitis treatments, otherwise the dentures will just become infected again.

Fortunately there is a extremely effective home remedy for angular cheilitis.

When I reveal the actual treatment method to you, well, I'm betting that you'll either just start scratching your head with disbelief, I wouldn't even be surprised if you started laughing out loud & if you do, I apologize as I know only to well how painful it is to laugh with angular cheilitis...

Sorry.

I will warn you now, this is odd, very odd, however it's become so popular that even doctors are recommending the procedure to their angular cheilitis patients..

Why?

Because it's safe, simple, cheap & it works, in fact it works so well that many people see the end of their painful angular cheilitis in a matter of only hours, not days or weeks, but hours,

there can't be to many drugs or topical creams which offer results at that speed can there?.

Do you know what the funniest thing I could think of when I first realized this procedure actually worked consistently for nearly everyone who tried it was ?..

The fact that those huge drug companies couldn't continue to sell me those awful, overpriced creams any more.
